Modern Interior of Garden Store

Visit Our New Locations

The construction of the Independence Hall Parkway necessitated vacating our old premises at 518 Market Street which we had occupied for 40 years.

Shortly after January 1st, we moved into our general offices and warehouse at 3rd and Spruce streets. The interior of the building was remodeled to suit our specific needs and to expedite the flow of orders. A shipping platform was constructed in the rear of the building and customers may drive in and have bulky material loaded directly in their cars.

On February 9th, Michell's Garden Store opened at 924 Chestnut street and a banner crowd was there to make our opening day a success in this new convenient location.

We feel this is not only the most modern and complete Garden Store in the Philadelphia area, but also in the East.

Similar to the Darwins in their tall, strong growth, and flowering at the same time. They produce immense blooms on long, stiff stems, and in some instances are larger than the Darwins. Their artistic colors make them great favorites with those who desire to contrast their bronze, terra-cotta, and buff shadings with the lighter-colored Darwins. They make a fine effect in hardy borders, and when used as a cut flower last a long while in water.

Everblooming Hybrid Tea Roses

Everblooming Roses produce beautiful flowers over a long season, from about ten weeks after they are planted in spring until late frosts. Those planted in the fall produce their finest blooms early the next summer and continue throughout the season. Practically all Everblooming Hybrid Tea Roses are fragrant at some time of the day. Most of them are hardy all over the United States if protected in winter.

From the long list of varieties in commerce we offer those that have survived the test for plant vigor and good blooming habit in most parts of the United States.

Five Sensational New Hybrid Tea and Floribunda Roses New Varieties for Fall 1951

FRED HOWARD. Top Winner for 1952 All-America Rose Selections. One of the last creations of the dean of American rosarians and one of his best, this Rose was named to honor its producer, Fred Howard. The long, rich yellow buds are tipped with a delicate penciling of light pink, and when the buds open you see a full double, high centered, beautifully formed flower. The plant is strong, hardy, fully branched, clothed in dark, shiny foliage, and grows as high as your head. Flowers on long stems, excellent for cutting, are produced from early spring until late in the fall. Each, \$2.75.

HEDDA HOPPER. The delicate pink of the flowers in all stages of opening is unusual in itself, but together with such a sweet perfume it is rare indeed. It is unbelievable that such delicate colored petals could be so sturdy. The buds of "Hedda Hopper" slowly open to a full centered, well formed, long lasting flower. Although pink Roses are numerous, "Hedda Hopper" will soon become one of the most popular in its color, another personality rose. Each, \$2.00.

HELEN TRAUBEL. The color varies with the weather—sometimes a light, sparkling pink, more often a luminous apricot. Its unusually large and long buds are magnificent, and the half-open flower and the glorious fully opened blooms display the lovely color more lavishly. The plant of Helen Traubel will always be one of the largest bushes in the Rose garden, so vigorous that it is nearly always with buds and blooms. Plant patent applied for. Each, \$2.75.

CONNIE MACK. (Floribunda). Deep velvety crimson blooms are carried in graceful clusters to give a "florists' spray" effect. Extremely mildew resistant leaves of dark, glossy green and its clean habit of growth together with the fine blooms pay high tribute to the grand old man of baseball.

To honor "Mr. Baseball" we offer this very beautiful new and distinct Rose. The flowers are a dark, velvety crimson in graceful clusters which have aptly been called "florists' sprays" Roses. Many blooms with long stems and long lasting qualities are produced from spring through fall. The sturdiness and vigor of this variety exemplifies the personality of the great man for whom it was named. Each, \$2.00.

VOGUE. (Floribunda). Plant Patent No. 926. ALL-AMERICA ROSE SELECTIONS WINNER 1952 Unique brilliantly glowing cherry-coral color. The individual flowers, 3-4 inches in diameter, are Hybrid Tea shaped with perfect high centered form. They open slowly from a dark cherry ovoid bud through all the graceful stages to the delightful cherry-coral open flower. The fragrance is rich, spicy and springlike, evident all year. Each, \$2.25.

THIS FALL IS A GOOD TIME TO MAKE A LAWN

The cool, moist weather of late summer and early fall affords an ideal condition for rebuilding a lawn that has suffered from drought, neglect, or the ravages of weeds. Seed sown at this time will show quicker growth and has a tendency to stool or spread out. Competition with weeds is practically eliminated at this season, since weeds are incapable of germination until spring, by which time fall-sown grass is thoroughly established. Seed may be sown successfully as late as October 15 in the latitude of Philadelphia, but we would recommend the month of September for best results.

We recommend sowing 5 pounds per 1000 square feet on new ground without grass. In renovating established lawns, use half the above quantities.

"Green Velvet"

A Special Michell Mixture

Our most popular and widely used mixture combined of the finest perennial lawn seeds. Recommended for the open, sunny lawn where a closely knit, weed free turf of lustrous green velvety appearance is desired. **Lb., \$1.45; 3 lbs., \$4.25; 5 lbs., \$6.95; 10 lbs., \$13.60; 25 lbs., \$33.25; 100 lbs., \$130.00.**

"Evergreen"

A Special Michell Mixture

Recommended to fill the requirements of the average lawn. This mixture will produce a very desirable turf of fine-bladed, hardy grasses, capable of withstanding considerable wear and periodic dry spells. **Lb., \$1.25; 3 lbs., \$3.65; 5 lbs., \$5.95; 10 lbs., \$11.60; 25 lbs., \$28.25; 100 lbs., \$110.00.**

Weedone Crab Grass Killer

Kills crab grass and chickweed faster and cheaper than ready-to-use dry formulas. Will not kill deep-rooted perennial grasses. It is non-poisonous, safe to use, and breaks down into a fertilizer after killing undesirable weeds. **5 oz. can, \$1.00; 20 oz. can, \$3.00.**

"Shaded Lawn"

A Special Michell Mixture

A mixture of shade-tolerant grasses that will produce a perfect sward in heavily shaded places. Such locations present problems other than lack of sunlight, and the soil should be checked for drainage, possibly acidity and low fertility. **Lb., \$1.40; 3 lbs., \$4.10; 5 lbs., \$6.65; 10 lbs., \$13.00; 25 lbs., \$31.75; 100 lbs., \$124.00.**

Michell's Lawn Dressing

A complete organic fertilizer made up expressly for use on lawns. Fall applications will induce healthy, vigorous growth, enabling the lawn to better withstand winter weather. Rake the upper surface of the soil and water immediately after applying. Apply 50 lbs. per 1000 sq. ft. on new lawns and half that quantity for established lawns. **5 lbs., 60c; 10 lbs., \$1.00; 25 lbs., \$2.00; 50 lbs., \$3.50; 100 lbs., \$5.50; 1/2 ton, \$45.00; ton, \$85.00.**

Spreaders

Uniformly distributes fertilizer, grass seed, top dressing and other granular materials. Far more accurate and simpler than the "hand method". Equipped with rubber tires, selective feed control and automatic shut-off. **16" 22 lb. capacity, \$7.95; 20" 40 lb. capacity, \$12.25; 30" 80 lb. capacity, \$18.75.**
